

# Builder Web Portals

*"We switched from our current software system to HomeFront and Sage Timberline Office. We feel that it is the best integrated software system available to residential builders. The service and support has been excellent".*

**Halminen Homes**  
Hannu Halminen,  
Toronto Ontario

## ONLINE SHARING & COLLABORATION WITH CUSTOMERS AND TRADES

With the need for increased communication between everyone involved in the home building process, HomeFront's **Builder Web Portals** is the key to improving overall efficiency and profitability. HomeFront's **Builder Web Portals** are a series of interactive and secure Web sites that allow home builders to publish information to the Web for authorized users to log on and learn more about the homes they are building or buying.

HomeFront's **Builder Web Portals** are an important extension to the HomeFront HomeBuilder Management Tool Kit. While HomeFront's other modules are used to manage the builder process from sales through construction to Service & Warranty, the **Builder Web Portals** solicit and communicate essential information with the customer and trade partner outside the company.

### CUSTOMER PORTAL

Customers can log in to a secure portal to view images of their home being built, stay on top of their contract and the status of construction.

#### With Customer Portal, customers can:

- Securely monitor the construction progress of their new home
- Keep up to date on their selections, change orders and total contract value
- View home photos at different stages of construction
- Access contracts, architectural drawings, and other important information
- Log service requests

### Integration With Popular Accounting Software

Integrates with some of the most widely-used accounting software applications including:

- Sage Timberline Office
- Sage Master Builder
- QuickBooks
- Simply Accounting by Sage

## VENDOR PORTAL

Gives vendors a central place to get instructions, change orders, drawings and timetables, preventing miscommunication and leaving a clear trail of instructions.

### With Vendor Portals, vendors can:

- View, Red-line and Take-off drawings using a built-in CAD viewer
- Review and accept or decline purchase orders and scheduled activities
- View construction schedule across all jobs
- Access option changes at any time
- Securely monitor the status of their particular jobs
- Report completion of work and request payment on PO's
