

Project Builder

"We switched from our current software system to HomeFront and Sage Timberline Office. We feel that it is the best integrated software system available to residential builders. The service and support has been excellent".

HOMEFRONT'S SCHEDULING MANAGEMENT SOFTWARE

ProjectBuilder, the scheduling module of HomeFront's HomeBuilder Management Tool Kit, provides critical value to every department in a home builder's organization. **ProjectBuilder** stands out among other scheduling programs because it links directly to actual and budgeted cost and sales information for cash flow analysis and other time sensitive reporting. Also, extending the benefits beyond the project manager, **ProjectBuilder** can create multiple schedules per job for your construction, sales and administration staff and allow them to easily manage schedules on any handheld device via standard Web browsers.

ProjectBuilder's user-friendly online interface for laptop or any handheld device extends the reach of HomeFront to the field and ensures real time reporting of job progress.

SCHEDULING AND COMMUNICATION:

- Create schedules based on templates, determine the critical path by specifying either the project start or end date
- View and manage your schedules in Activity, Gantt, Resource or Calendar view
- Manage multiple schedules per job
- View and update multiple schedules for several jobs in the same Gantt view
- Keep your trades in the loop with automatic e-mail notifications or through a secure vendor portal
- View resource allocations to ensure a balanced load of work for trades

ONLINE INTERFACE

- Access and manage schedules on the Web or any handheld device
- Initiate Field and Variance PO's on any handheld device directly from the field

Integration With Popular Accounting Software

Integrates with some of the most widely-used accounting software applications including:

- Sage Timberline Office
- Sage Master Builder
- QuickBooks
- Simply Accounting by Sage

QUALITY ASSURANCE

- Enforce completion of standard checklists
- Link schedules to purchase orders and financial information for accurate cash flow and cost to complete reporting
- Approval of activities to be paid in addition to regular activity completion can be used to automatically approve payable invoices

POPULAR REPORTS

- Cash flow analysis by Area, Phase or Job
- Calendar Report for Area, Phase or Job
- Site Super Schedule Reports

ProjectBuilder was developed as an integral part of the HomeFront Suite, which offers a complete sales, construction and service management system designed for homebuilders of any size. This powerful hands-on scheduling tool makes it easy to maintain quality, build faster and achieve higher profitability.

ProjectBuilder is a smart choice for home builders who are looking to manage their construction process more efficiently and eliminate costly mistakes. It is cost effective, easy-to-use and facilitates project management at each point of the construction process.
