

Quality Builder

"We needed a central sales system that could capitalize on our existing Accounting, Estimating, Scheduling, and Warranty data. HomeFront filled that last piece of our systems puzzle and has improved the ability to manage our building process. We now have a bridge that integrates all of our systems to make better informed business decisions."

Morrison Homes
Philip Robichaud, MCP
IT Manager

SERVICE AND WARRANTY MANAGEMENT SOFTWARE

HomeFront's **QualityBuilder** empowers you, the home builder, to survive and win in today's tough market. Picking up where PrecisionBuilder and ProfitBuilder leave off, **QualityBuilder** addresses the post construction phase of the homebuilding process. It is the most effective way for home builders to track and analyze their service, warranty, and punch list data – saving them time and money.

SERVICE COORDINATION

- Inbox for incoming Service requests from Customer online portal or entered by coordinator
- Auto-scheduled appointments for walk-thrus and post possession follow up appointments
- Multiple views for dispatching work-orders; Calendar, by trade, by customer and more
- Instant access to all information related to customer file; Options, Selections, Trade history, Service History, Attached Documents
- Work Order aging represented by color to facilitate prioritization
- On Screen follow-up reminders and task lists

PROBLEM AND TREND MANAGEMENT

- Alerts home builder to trends and problem patterns
- Provides a system of control over problem vendors and suppliers

Integration With Popular Accounting Software

Integrates with some of the most widely-used accounting software applications including:

- Sage Timberline Office
- Sage Master Builder
- QuickBooks
- Simply Accounting by Sage

CUSTOMER AND VENDOR COMMUNICATION

- Broadcast mail merges to customers for thank you letters, surveys, and notifications
- Communication with trades through fax, email, or direct mail
- Provides customizable walk-thru checklist templates

POPULAR REPORTS

- Outstanding Work-Orders by Trade or Customer
- Daily Workload
- Deficiency count and average completion time by Trade

“HomeFront is an integral part of our organization. It has become our primary communication tool bridging departmental gaps and linking everyone together - whether in the office, sales centre, or in the field.”

Integration of the HomeFront Suite with our Sage Timberline Office software has provided process efficiencies throughout the company and eliminated costly errors that can occur with a manual system.”
